Paris region, France

PROFILE

Looking for a summer internship, July to August 2027, in data science, machine learning or data engineering. Engineering student at **Télécom Paris** (GEI-UNIV competitive exam, 20 places on this track), BSc at **Sorbonne Université** (**ranked 2nd of 57** in year 2). **Four data roles**, including a model and a service shipped to production at DOCENT. Statistics, metric design and Bayesian modelling, through to production.

EDUCATION

Engineering degree (Diplôme d'ingénieur) Télécom Paris, Institut Polytechnique de Paris, Palaiseau — 2026 - 2029

Admitted through the GEI-UNIV competitive exam: 20 places at Télécom Paris on this track. Year 1: probability, Fourier analysis, information theory.

BSc Computer Science, Mathematics minor Sorbonne Université, Paris — 2023 - 2026

Averages: year 1 **17.49** | year 2 **15.92, ranked 2nd of 57** | year 3 **17.53** (out of 20). Data Science **1st of 117** | Networks **1st of 316** | Algorithms II 3rd of 318 | Mathematics 36th of 2227.

EXPERIENCE

DOCENT — Mar - Aug 2026

Data Scientist Intern

Cultural trend analysis platform | English-speaking team

- **Segmentation method put into production**, selected from 15 configurations evaluated on 8 independent tests (scikit-learn, scipy, UMAP); custom overlap score built because degenerate partitions kept winning the standard metrics.
- **Stopped tuning on statistical evidence:** the model agrees with the experts (ARI 0.189) more than the experts agree with each other (0.170). Caught a UMAP artifact before publication: silhouette from 0.018 to 0.326 on an identical partition.
- **Brand-to-artist matching engine: 0.768** top-1 precision against 0.140 at random, 18 methods compared under three protocols; Bayesian Bernoulli-Beta variant.
- **LLM annotation pipeline:** three no-code workflows (n8n) replaced by a production Python service (FastAPI, PostgreSQL, ~60 REST endpoints, Docker, AWS).

Agency 1301 — Autumn 2025

Data Scientist (freelance)

Detection of unauthorised republication of photographs

- **Made the detection rate interpretable:** typed failure statuses, so a missing result is no longer confused with a technical failure. PostgreSQL database opened to non-technical teams through NocoDB.

Prana France — May - Aug 2025

Data Analyst Intern

Industrial SME, ventilation

- Power BI dashboards (sales, leads) on data prepared in SQL; customer-support **RAG** assistant in Python, deployed on AWS.

SAS Datafoncier — Jun - Aug 2024

Data Scientist Intern

Start-up, real-estate market analysis

- Real-estate market prediction by regression (cross-validation, hyperparameter tuning, missing data); **ResNet** features on property photos to estimate their condition.

SKILLS

Statistics & ML: Hypothesis testing | bootstrap | Bayesian inference | metric design | scikit-learn | PyTorch | clustering | PCA, UMAP

Generative AI: LLMs | RAG | embeddings | vector databases | n8n

Data & backend: Python | SQL | C/C++ | PostgreSQL | FastAPI | Pandas | Power BI | Docker | AWS (EC2, RDS, S3) | Git | Linux

Languages: Russian (native) | French (C1) | English (B2, TOEFL iBT 87) | Driving licence B

Interests: Tennis | chess | competitive programming | Kaggle
